

VOCATIONAL FACULTY

VOCATIONAL FACULTY – BTEC HEALTH & SOCIAL LEVEL 1 / 2
YEAR 10 & 11

<i>Topic(s) covered</i>	<i>Resources available e.g. Website</i>
<p><u>Component 1 – HUMAN LIFESPAN DEVELOPMENT</u> In this component, you will study how people grow and develop over the course of their life, from infancy to old age, this includes physical, intellectual, emotional and social development and the different factors that may affect them. An individual's development can be affected by major life events, such as marriage, parenthood or moving house. You will learn about how people adapt to these changes as well as the types and sources of support that can help them.</p> <p>The component is assessed by internally assessed coursework.</p> <p><u>Component 2 – HEALTH & SOCIAL CARE SERVICES AND VALUES</u> People who need social care are not always ill – they may be unable to do everyday activities like getting dressed or feeding themselves, or need help with their day-to-day lives. Providing good health and social care services is very important and a set 'care values' exists to ensure this happens. Care values are important because they enable people who use health & social care services to get the care they need and to be protected from different sorts of harm. This component will give you an understanding of health & social care services and will help you develop skills in applying care values which are common across the sector (some of which are transferable to other sectors that involve interactions with clients or customers).</p> <p>This component is assessed by internally assessed coursework.</p>	<ul style="list-style-type: none">• Websites covering Health & Social Care values• Show My Homework• Class notes and workbooks• Text books• Past papers• BTEC Revision Guides and Workbooks• Vocational Excellence Club

<i>Topic(s) covered</i>	<i>Resources available e.g. Website</i>
<p><u>Component 3 – HEALTH & WELLBEING</u></p> <p>In this component, you will look at the factors that can have a positive or negative influence on a person's health & wellbeing. You will learn to interpret physiological and lifestyle indicators and what they mean to someone's state of health. You will learn how to use this information to design an appropriate plan for improving someone's health & wellbeing including short and long term targets. Additionally, you will explore the difficulties an individual may face when trying to make these changes.</p> <p>This external component builds on the knowledge, understanding and skills acquired and developed in Components 1 & 2. Learners will be given a case study and will assess an individual's health and wellbeing, drawing on their understanding of life events from Component 1. They will design a health & wellbeing improvement plan that draws on their knowledge of services and care values from Component 2.</p> <p>You will also develop transferable skills, such as analysing information and written communication skills which will support your progression to Level 3 Vocational or academic qualifications.</p>
