## KS3 CURRICULUM: SCIENCE - YEAR 7 2023-2024

## **Curriculum Aim:**

In science we aim to develop a deeper understanding of a range of scientific ideas in biology, chemistry and physics. Pupils will be able to connect the three disciplines and become aware of the big ideas underpinning scientific knowledge and understanding.

<u>Link to prior learning:</u> The subject builds on key skills learned in primary school including planning, taking measurements, recording data and identifying evidence.

Rationale of sequencing: The course begins with an introduction to science to ensure everybody is familiar with some of the key concepts and health and safety. We then work through biology, chemistry and physics. By grouping the topics together as such, it allows students to become experts in a particular discipline and allows them to develop their use of scientific vocabulary throughout, building on knowledge acquired.

	Focus / Topic	Knowledge	Skills	Assessment
Autumn 1	Introduction to	Identify a range of scientific equipment.	Be able to select, plan and carry out	B1 Cells end of
	science	<b>B1</b> - Explain the functions of the cell wall, cell membrane, cytoplasm, nucleus, vacuole,	scientific experiments to test predictions	topic test
	B1 – Cells	mitochondria and chloroplasts.	and identify independent, dependent	Required practical
	B2 – Structure	Identify similarities between animal and plant cells.	and control variables.	on using
	and function of	Recognise the role of diffusion in the movement of materials in and between cells.	Use appropriate techniques, apparatus	microscopes
	body systems	Identify structural adaptations of unicellular organisms.	and materials during laboratory work	Required practical
		<b>B2</b> - Outline the hierarchical organisation of multicellular organisms from cells to	paying attention to health and safety.	on osmosis
		tissues to organs to systems to organisms.	Apply mathematical concepts and	B2 Body systems
		Describe the structure and function of the human skeleton including support,	calculate results.	end of topic test
		protection and movement.		
		Describe the function of muscles and examples of antagonistic pairs of muscles.		
		Identify the structure and function of the gas exchange system in humans including the mechanism of breathing.		
	B3 –	B3 - Identify and describe the structure and function of the male and female	Understand that scientific methods and	B3 Reproduction
Autumn 2	Reproduction	reproductive systems, the menstrual cycle, gametes and fertilisation including the	theories develop as earlier explanations	end of topic test
	C1 – Particles	effect of maternal lifestyle of the foetus through the placenta.	are modified to take account of new	C1 Particles end of
	and their	Describe reproduction in plants including the structure of a flower, types of pollination,	evidence and ideas.	topic test
	behaviour	fertilisation, seed and fruit formation and dispersal	Make predictions using scientific	
		C1 - Describe properties of the different states of matter in terms of the particle model	knowledge and understanding.	
		including gas pressure.	Make and record observations and	
		Use the particle model to explain changes of state.	measurements using a range of methods	
			for different investigations and evaluate	
			the reliability of methods suggesting	
			possible improvements.	
	C2 – Elements,	C2 - Describe a simple model of the atom.	Select, plan and carry out scientific	C2 Elements end of
Spring 1	atoms, and	Identify differences between elements, atoms and compounds.	experiments to test predictions and	topic test
	compounds	Recognise and apply chemical symbols and formulae for elements and compounds.	identify independent, dependent and	C3 Reactions end of
	C3 – Reactions	C3 - Explain the law of conservation of mass.	control variables.	topic test
		Explain chemical reactions as the rearrangement of atoms.		

		Describe thermal decomposition and combustion.  Explain the difference between exothermic and endothermic reactions.	Make predictions using scientific knowledge and understanding. Pay attention to objectivity and concern for accuracy, precision, repeatability and reproducibility.	Required practical on temperature change
Spring 2	C4 – Acids and Alkalis P1 – Forces	C4 - Identify reactions of acids with alkalis and metals including the products formed.  Define acids and alkalis in terms of neutralisation reactions.  Use the pH scale and indicators for measuring acidity and alkalinity.  P1 - Recognise forces as pushes or pulls arising from an interaction between two objects.  Show the relationship between force and extension using Hooke's Law.  Identify forces as contact and non-contact.  Associate forces with stretching and squashing objects.  Apply force arrows and diagrams to explain balanced and unbalanced forces.	Evaluate risks.  Make and record observations and measurements using a range of methods.  Make predictions using scientific knowledge and understanding.  Evaluate data, showing awareness of potential sources of random and systematic error.  Present observations and data using appropriate methods, including tables and graphs.  Use and derive simple equations and carry out appropriate calculations.	C4 Acids and alkalis end of topic test P1 Forces end of topic test Year 7 assessment week beginning 21st February 2022
Summer 1	P2 – Sound P3 – Light	P2 - Recognise that sound needs a medium through which to travel and identify the difference of the speed of sound in solids, liquids and gases.  Explain frequency measured in hertz, echoes, reflection and ultrasound.  Discover the auditory range of humans and animals and recognise the danger to the eardrum of loud sounds.  P3 - Explain the similarities and differences between light and sound waves.  Explain the transmission of light through materials including absorption and reflection.  Describe the law of reflection.  Explain how and why we see objects as different colours.	Make predictions using scientific knowledge and understanding. Ask questions and develop a line of enquiry based on observations of the real world alongside prior knowledge and experience. Identify further questions arising from your results.	P2 Sound end of topic test P3 Light end of topic test
Summer 2	P4 – Space	P4 - Identify our sun as a star and recognise that there are other stars in our galaxy and other galaxies.  Explain the seasons in terms of the Earth's tilt.  Explain how eclipses form and the stages of the moon.	Make predictions using scientific knowledge and understanding. Interpret observations and data, identifying patterns and using observations to draw conclusions. Identify further questions arising from your results.	P4 Space end of topic test End of year assessment
